Berkeley, CA

Dear John,

Thanks for the recent discussion on LaTeX letter support. I've created a
`letter.latex` template to support letter writing with Pandoc, and I'd appreciate
any feedback or suggestions you might have.

They say no one writes letters anymore, and if that's true, then this change
may not be necessary. However, I believe the real reason no one writes letters
anymore is that it's not yet easy to do with Pandoc.

Cheers,

Jason Pearcy

P.S. I didn't add support for all letter features, but you can use `header-includes`
for obscure ones.
